

Ensuring Every Learner is Successful

Quality First Instruction- Our greatest impact on student learning begins and ends with high quality teachers and high quality teaching. Our teachers work together to understand and appreciate every child in their care, review student learning data, inspect curriculum, and align instructional tools to provide quality instruction for every learner.

- Action Plan
- Strategic Plan

Tiered Support - There are times when students need additional time and support in their learning. When students need additional support to meet grade level expectations, the school will leverage specialists to support those students. Additionally, some students are ready for learning beyond academic standards. Our core teachers and specialists work together to create challenging work and experiences for those learners.

- Reading Specialists
- Math Specialist
- Wellness

Professional Learning - Akin to other fields, education is a profession that requires continuous learning in social-emotional development, cognitive psychology, data analytics, and curriculum and instruction. Professional learning is incorporated weekly, monthly and throughout the year to best prepare and enhance professional expertise.
