INFORMATION REGARDING SCHOOL IMPACT FEES

- ✓ Why do school districts collect school impact fees? School Impact Fees are collected for the use of construction, modernization of school facilities and/or Capital Facilities Improvements only. Government Code Section 66006 requires segregation of school impact fees into a separate capital facilities account or fund and specifies that those fees and the interest earned on those fees can only be expended for the purposes for which they were collected.
- ✓ Construction projects required to submit impact fees are defined as:
New constructions, remodel/addition includes habitable area only. Habitable area is defined as the floor area of conditioned space on all floors including basements, intermediated floor tiers of mezzanines, and penthouses, measured from the exterior faces of exterior walls and the exterior face of walls separating conditioned and unconditioned spaces. This conditioned floor area does not include covered walk-ways, open roofed-over areas, porches, exterior terraces or steps, chimneys, roof overhangs, parking garages, or unheated basements.
- ✓ Residential and commercial construction projects greater than 500 square feet as defined above are required to submit impact fees.
